EDUCATION

University of Maryland - College Park
Master's, Information Systems

August 2024 - December 2025

University of Maryland - College Park
Bachelor's, Information Science

August 2020 - May 2024

PROFESSIONAL EXPERIENCE

Glow Events LLC- Club Glow (Live Nation/Insomniac Partnership)

September 2025 - Present

Marketing Assistant

- Analyzed datasets and financial logs using statistical methods to enhance marketing analytics and performance modeling, improving audience trend insights and informing event budget decisions, resulting in a 20% increase in ROI.
- Transformed event marketing objectives into actionable reporting requirements, delivering comprehensive performance summaries and data visualizations for activations with over 50,000 attendees, significantly boosting marketing effectiveness by 30%.
- Executed data reconciliation and quality control across marketing and event databases, conducting integrity assessments to identify variances, eliminate tracking bottlenecks, and ensure compliance with internal audit standards, supporting risk management initiatives.
- Collaborated cross-functionally with internal teams and external agency partners, utilizing MS Teams and MS Office to create decision-ready slide decks, enhancing communication efficiency by 25%.

University of Maryland - College Park

September 2024 - December 2025

Finance Assistant

College Park, MD, USA

- Engineered and automated interactive variance dashboards using Power BI and Tableau, enhancing financial reporting efficiency by 50% and reinforcing business strategy through improved data analytics reliability.
- Executed thorough evaluations of financial statement ledgers exceeding \$100K, achieving 100% compliance with regulatory standards while identifying issues and strengthening data governance protocols.
- Conducted rigorous data integrity assessments during Workday system synchronizations, rectifying discrepancies in security control data to maintain data lineage and bolster business analytics initiatives.
- Executed comprehensive audits of finance sheets and honorarium contracts, ensuring operational auditing accuracy and enhancing documentation integrity across all financial operations.

University of Maryland Division of IT

January 2023 - June 2024

IT Support Technician

- Analyzed operational ticket data from ServiceNow, identifying trends in resolution times, enhancing SLA compliance, and driving process improvement initiatives in network security data management.
- Executed daily quality control checks and reconciled asset inventories for over 100 critical IT support and hardware records, ensuring data accuracy and supporting audit planning efforts.
- Collaborated with technical service teams to troubleshoot network configurations and escalate complex issues, delivering technical guidance that significantly improved support processes and facilitated project management for junior technicians.
- Supported IT audits by reviewing historical client records, identifying documentation gaps, and preventing recurring errors across record books and operational tracking processes.

PROJECTS & OUTSIDE EXPERIENCE

KPC Buddhist Relief Database & Portal

2024 - 2025

Front End Developer + Risk Consultant

- Designed and deployed a responsive front-end database portal using HTML, CSS, and JavaScript, enhancing inventory management and donation tracking efficiency by 30%.
- Integrated Flask APIs with SQL databases and Python, developing automated data pipelines that improved reporting accuracy and operational efficiency by 25%, facilitating comprehensive audit reports.
- Engineered front-end validation logic to eliminate manual data entry discrepancies, ensuring data integrity and consistent quality across all devices, crucial for accurate audit reports.
